PRINTFAIR

ITCC 41 MILESTONE 4 - TESTING

Group Members: Gio Duldoco, Godofredo Natividad III, Yassin Unte

Instructor: Francis King Uyguangco

1. Identified Issues

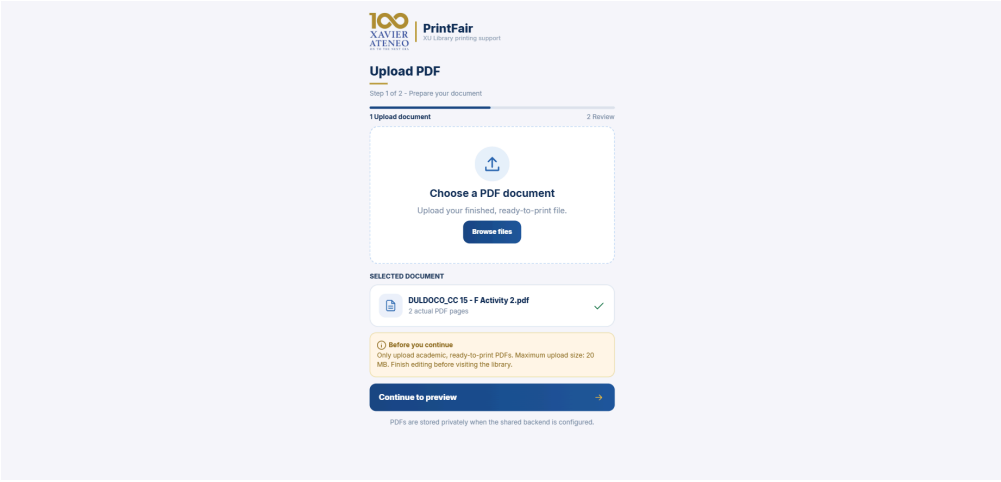

Bugs/problems	Description	Status
BUG-1	Retrieved PDF contains all original pages instead of selected pages.	FIXED
BUG-2	Correction form error messages are difficult to read.	FIXED
BUG-3	Homebar icons extend beyond its fixed bar	PENDING

2. Actions Taken to Resolve Found Issues

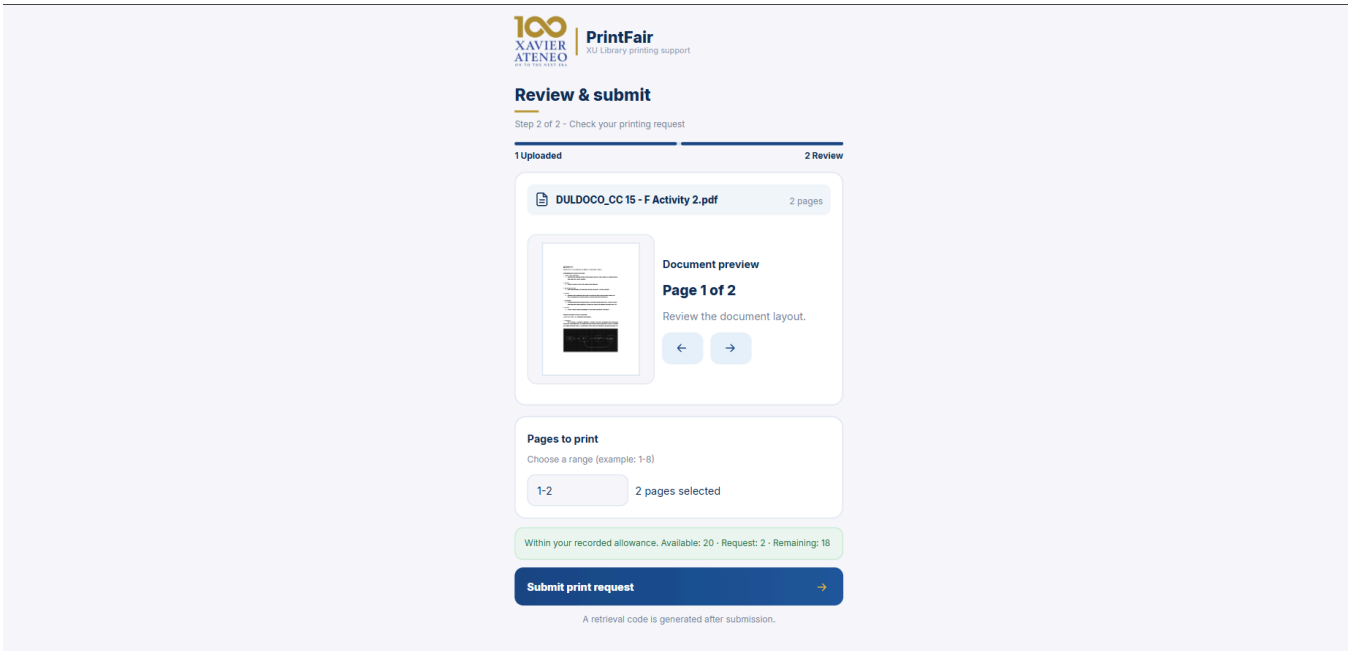

Bugs/problems	Action Taken
BUG-1	Implemented PDF extraction using pdf-lib
BUG-2	Improved error message styling and positioning
BUG-3	Adjusted homebar width, icon sizing, and spacing [still working on itl]

3. Testing results (screenshots supported)

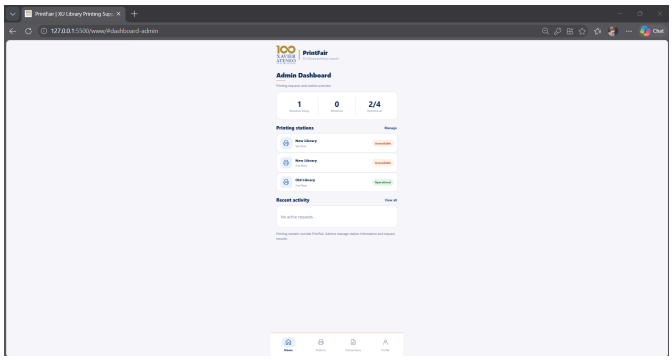

DULDOCO [TESTING feature/document-requests]:

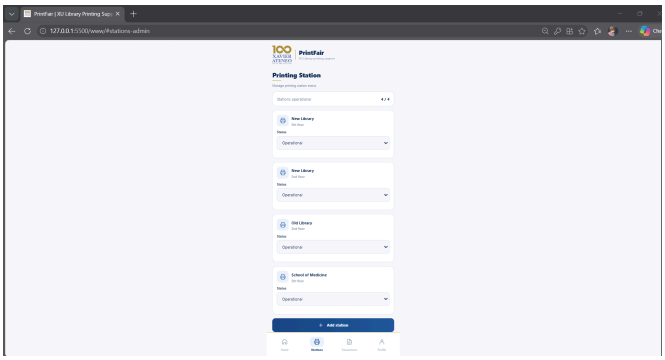

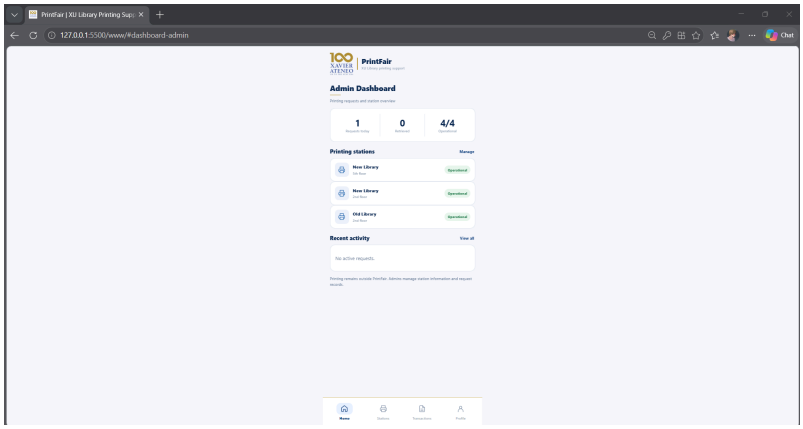

Testing PDF uploading and preview the uploaded document [PASS]

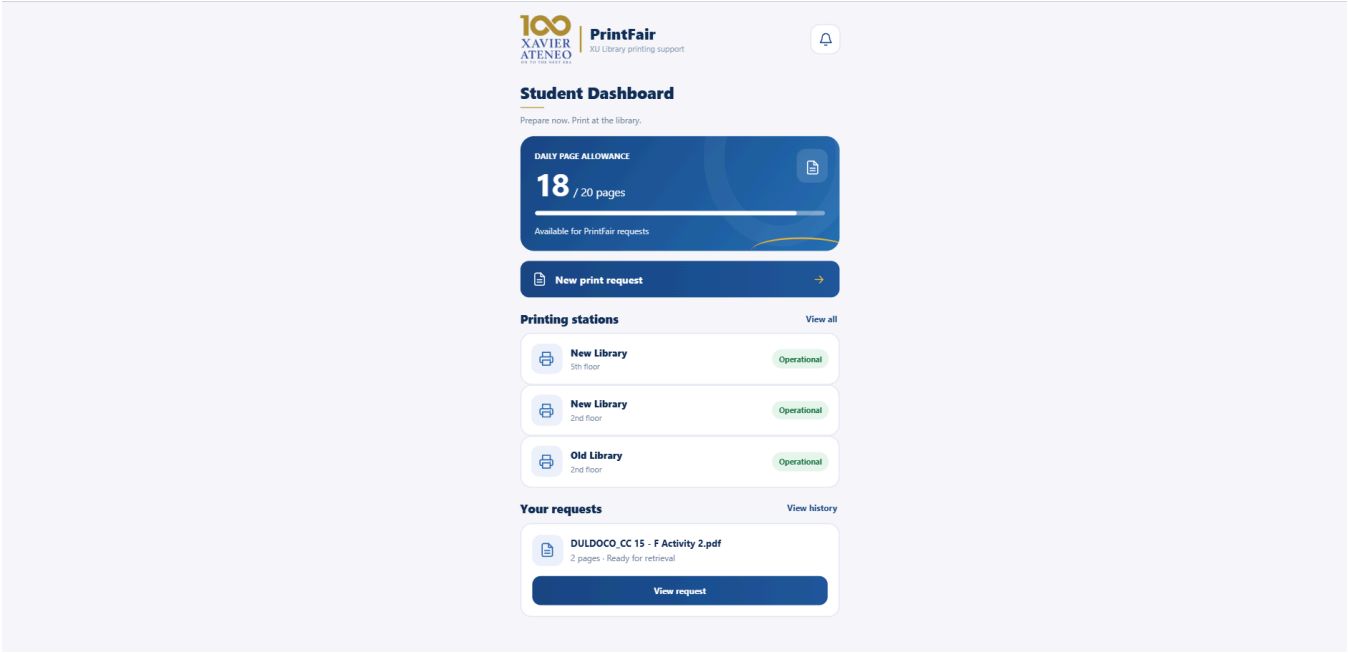

Checking page count and page selection if it is correct [PASS]

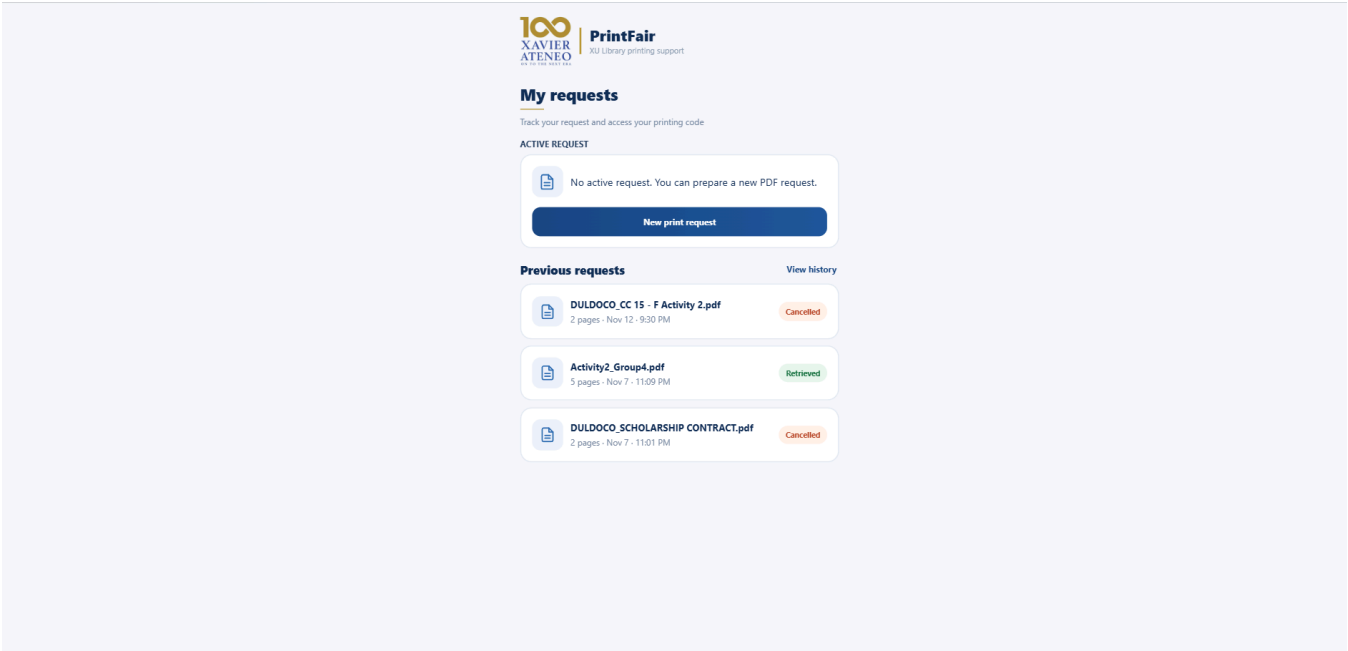

Try testing to adjust and manage the station status in Administrator [PASS]

Can see the station status in the Student dashboard [PASS]

Testing to cancel the print request and able to see the printing request history which it is updated [PASS]

2. NATIVIDAD [testing feature/station-kiosk]:

1. Testing Scope

The testing focused on the Station Kiosk feature, particularly station availability updates and retrieval code validation. The purpose was to ensure that students can view updated station statuses and successfully retrieve their requested PDF documents using valid retrieval codes.

The testing also covers invalid, expired, and already-used retrieval codes to verify that the system properly handles unsuccessful retrieval attempts.

2. Test Results

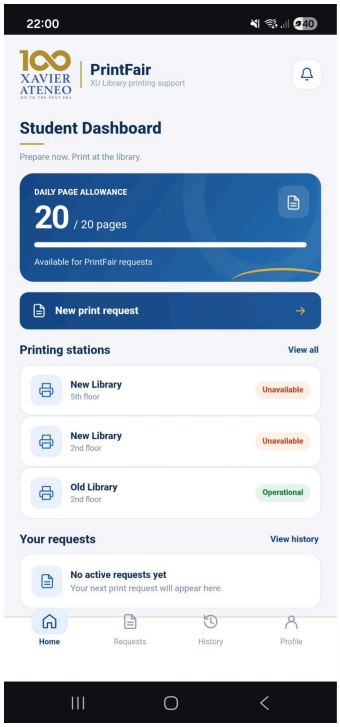

Test ID	Test Description	Platform	Actual Result / Evidence	Status
SA-01	View station status controls	Browser	The admin station page displays station entries and status choices, including Operational, Unavailable, and Under Maintenance. See Evidence 1.	PASS
SA-02	Change a station status and verify the updated status is visible to students	Browser	The supplied screenshots show the admin status controls, but do not show the student-facing page after a status change. This result is not confirmed.	PASS
KC-01	Enter a valid, unused retrieval code	Browser	The kiosk accepted the current retrieval code and displayed the document as ready for retrieval. See Evidence 2.	PASS
KC-02	Open the retrieved PDF	Browser	The PDF opened in another tab without an error, as recorded in the supplied testing notes. See Evidence 3.	PASS
KC-03	Enter an invalid retrieval code	Browser	No test result or screenshot for an invalid code was included in the supplied report.	TESTING
KC-04	Enter an expired retrieval code	Browser	No test result or screenshot for an expired code was included in the supplied report.	TESTING
KC-05	Enter an already-used retrieval code	Browser	No test result or screenshot for an already-used code was included in the supplied report.	TESTING
KC-06	Check the student's printing history after retrieval	Browser	The document appears in Printing History with the status “Retrieved.” See Evidence 4.	PASS

No major bugs were encountered during the completed Station Kiosk browser tests. Station availability updates and valid retrieval code processing worked as expected. However, invalid, expired, and already-used retrieval code scenarios still require further testing.

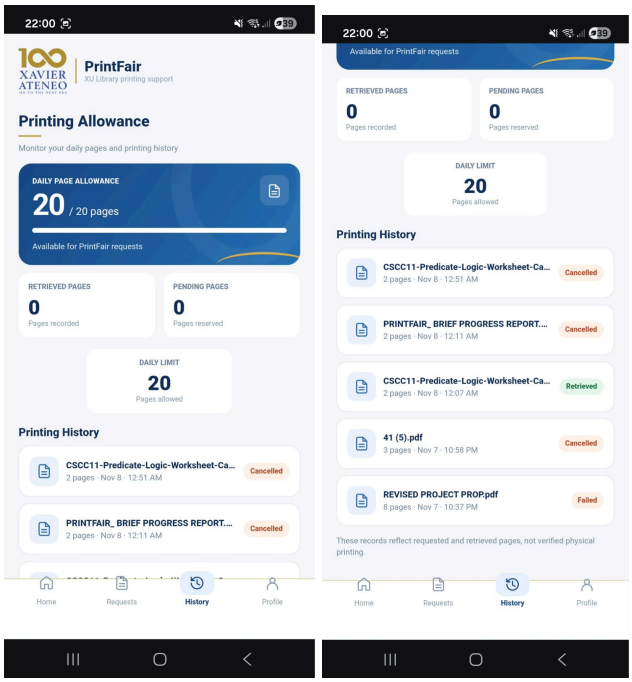

3. UNTE [testing feature/allowance-transactions]

STUDENT SIDE TESTING

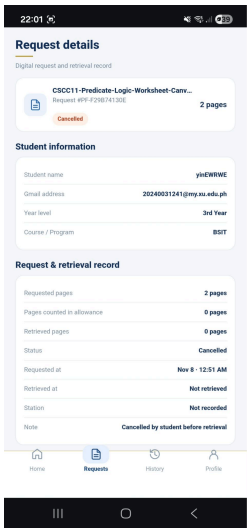

1. Student Dashboard Allowance

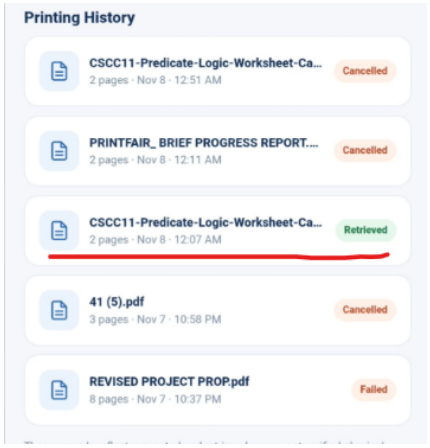

2. Allowances History

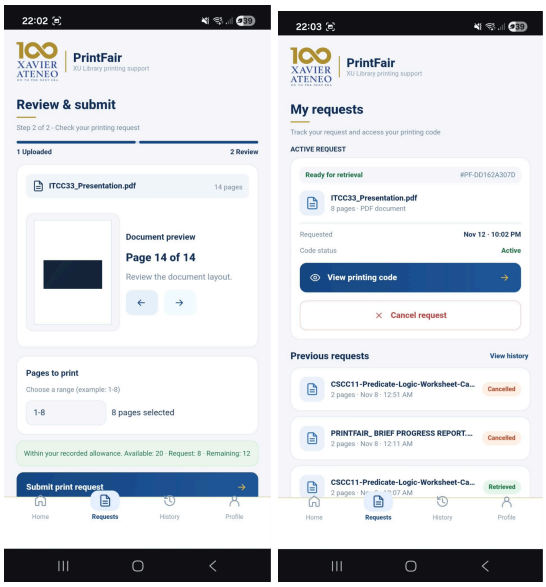

3. Retrieved/Cancelled Request Details [PASS]

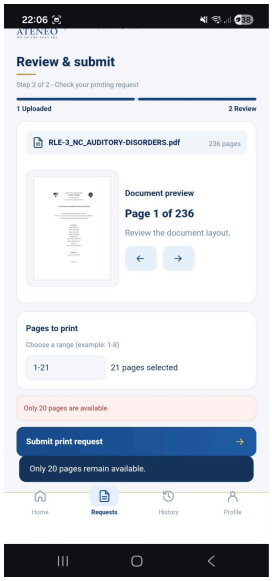

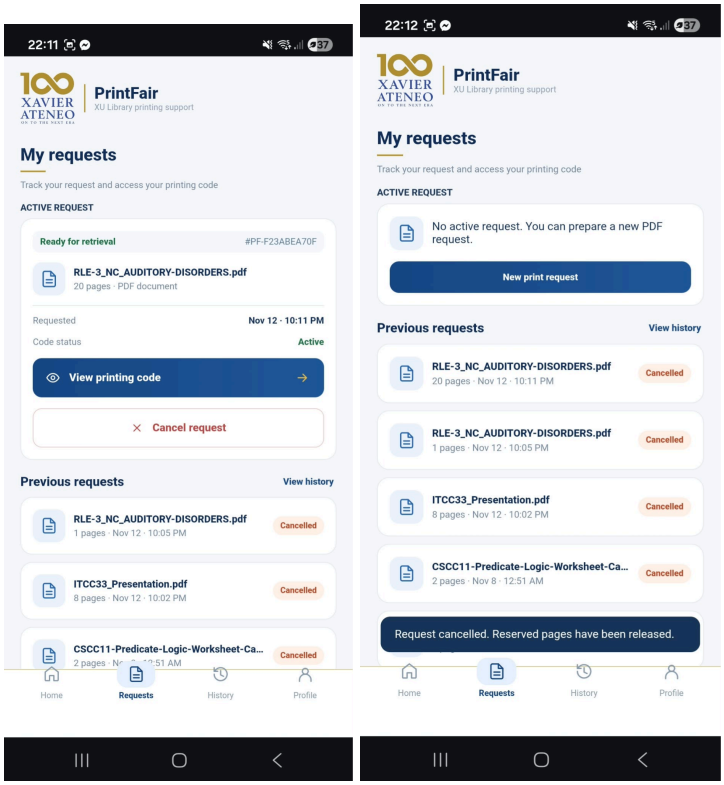

4. Successful Print Request [PASS]

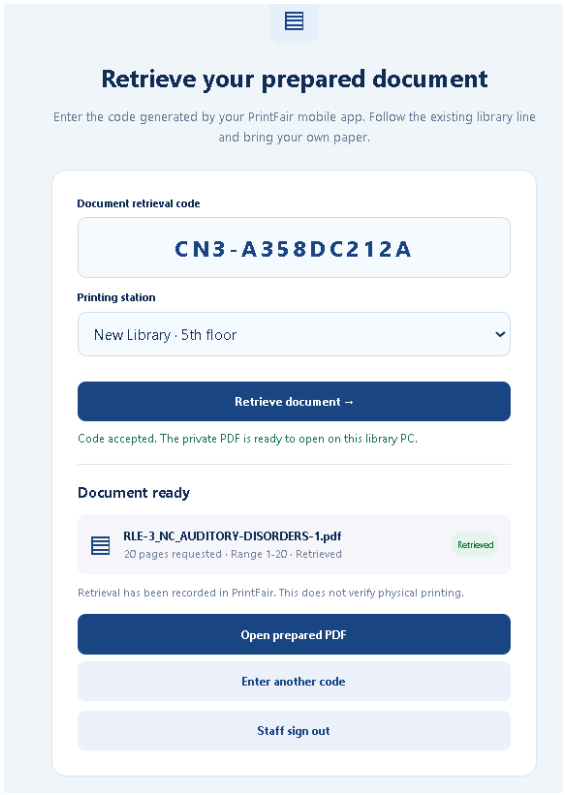

5. Excess Allowance Rejected [PASS]

6. Cancelled Request Allowance [PASS]

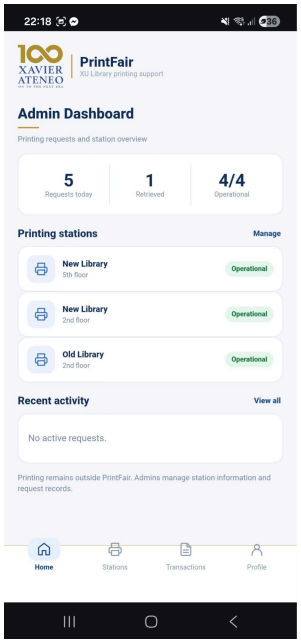

7. Successful kiosk retrieval [PASS]

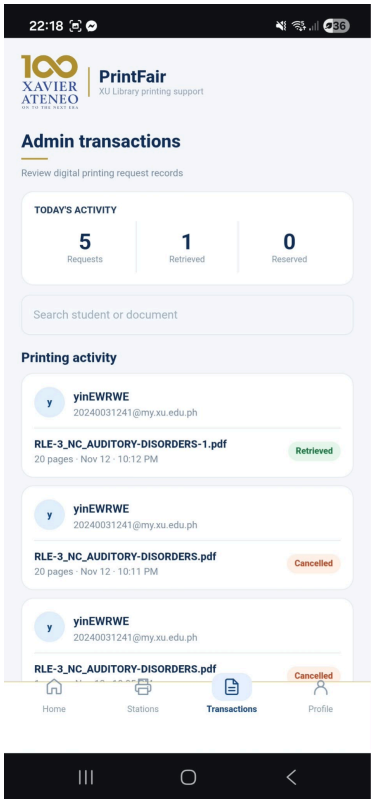

STAFF SIDE TESTING

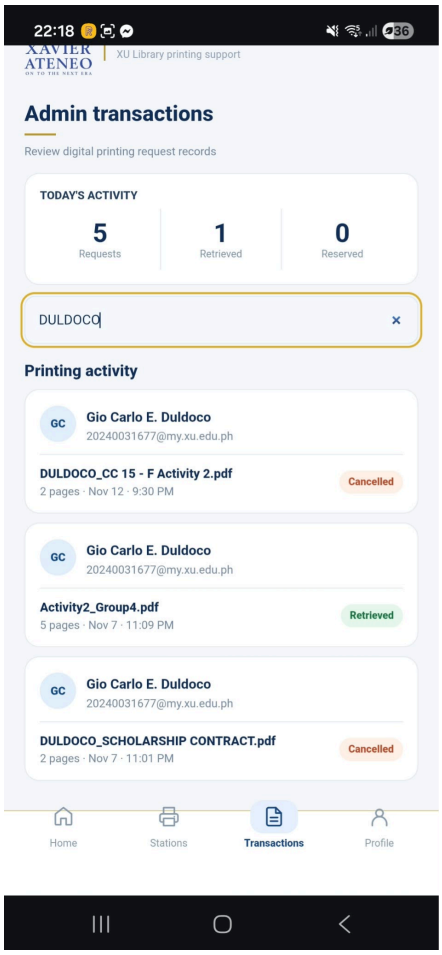

1. Admin/staff dashboard

2. Staff transactions list and results

3. Transaction details of a specific user [PASS]

4. Successful correction form [PASS]
